

DOMED CRYSTAL LABELS

UZLEX

BUY EQUIPMENT OR USE OUR PRODUCTION

WORKING STATION FOR DOMED STICKERS

UZLEX DOMING LAB is used to make doming stickers and labels of various shapes and sizes.

Two-component polyurethane resins of different hardness are used to produce logos, advertising and design lettering and graphics for application on almost all surfaces: glass, metal, painted surfaces, textiles, etc.

The surface of the finished label is not a subject of fading and yellowing, it is resistant to both mechanical and household chemicals, gasoline and industrial oils as well as environment: UV and humidity.

PRINTING MEDIA

For more attractive domed labels, we produce special range of media for eco-solvent printing on PE liner:

- Mirror silver
- Mirror gold
- White
- Transparent

Made in Latvia 

CRYSTAL LABEL PRODUCTION

You can also use our DOMING LAB CRYSTAL LABELS PRODUCTION to make any PU DOMED LABELS without volume limitations!

- Minimum order from one A4
- High product quality
- Fast reaction and good service
- Worldwide delivery
